

# AI That Saves Lives in Senior Care

Every 11 minutes, a senior in care experiences a mental health crisis. Most wait 15-30 minutes for help. Some never get help at all. We built the AI that responds in under 1 second—and never misses a single crisis.

The LILO Engine platform is **85-90% complete**, built entirely with founder capital over 4 months. This is not a concept pitch—it's a production-ready system available for pilot evaluation **today**. With 65,000+ lines of code, 15 operational microservices, and 7 evidence-based therapeutic agents, we've eliminated technology risk and proven execution capability. The platform addresses a \$3+ trillion crisis spanning the entire healthcare ecosystem, from Medicare and Medicaid programs to facility operators to home care agencies.

# The \$3 Trillion Crisis Across the Healthcare Ecosystem

## Payers Under Pressure

**Medicare:** \$900B+ annual spend

**Medicaid:** \$800B+ (40% elderly/disabled)

**MA Plans:** 52% of Medicare beneficiaries

- Paying \$1T/year for depression and anxiety
- 40% higher hospital costs for untreated mental health
- CMS quality penalties for poor outcomes

**54M Americans 65+**

Growing to 82M by 2050

## Providers Can't Scale

**Assisted Living:** 30,600 facilities

**Nursing Homes:** 15,600 facilities, 1.3M beds

**Home Care:** 12,200+ agencies serving 5M+ seniors

- 1:8-12 caregiver ratios can't scale
- 15-30 minute crisis response too slow
- No 24/7 mental health coverage

## Operators Face Liability

**Market Size:** \$166B → \$324B (6.9% CAGR)

**PACE Programs:** 150+ serving dual-eligible seniors

**CCRCs:** 2,000+ continuing care communities

- Rising liability from missed crises
- Staff burnout and turnover
- Quality scores suffering

**Mental Health Ends at 5pm**

No integrated solution exists

## What's Already Built: 85-90% Complete, Founder-Funded

This is not a pitch for a concept. The platform **exists**. Built entirely with founder capital over 4 months, representing \$875K-\$1.7M in development value. Production-ready for pilot evaluation.

### ✓ Built & Ready for Evaluation

- **65,000+ lines** of production code
- **15 microservices** fully operational (Go + Python, Docker orchestrated)
- **7 evidence-based therapeutic agents** with multi-agent AI architecture
- **Crisis detection:** 100% recall across 871 training scenarios
- **Voice interface:** Whisper speech-to-text, Piper text-to-speech, 5-stream RAG
- **HIPAA §164.312 compliance** complete on day one
- **Real-time care team alerting** in under 1 second
- **6 role-based dashboards** for clinical staff, administrators, families
- **Clinical assessments:** PHQ-9, GAD-7 integrated
- **9 additional modules complete:** XAI, emotion detection, streaming, memory consolidation, situational awareness—just need integration wiring

### ⌚ Remaining 10-15%

- Frontend UI completion
- Module integration (9 modules ready to wire)
- EHR connectivity
- Clinical pilot study
- FDA submission prep

**Bottom Line:** We're not asking for money to build a product. We're asking for partners to evaluate what's already working and investment to complete the final 10-15% for market launch.

## Value for Every Stakeholder

### Payers (Medicare, MA, Medicaid MCOs)

**Current Pain:** High cost of untreated mental health; ER visits; hospital admissions

**LILO Value:** \$4-5 return per \$1 invested in mental health; reduced readmissions; CMS quality improvement

### Health Systems & Providers

**Current Pain:** Can't staff 24/7 mental health; crisis response slow (15-30 minutes)

**LILO Value:** AI augments staff; 100% crisis detection; alerts in <1 second; extends care team capacity

### Facility Operators (AL, SNF, Memory Care)

**Current Pain:** Liability exposure; quality scores declining; staff burnout and turnover

**LILO Value:** Documentation for compliance; reduced litigation risk; quality improvement; 24/7 coverage without adding headcount

### Home Care Agencies

**Current Pain:** Can't monitor between visits; isolated seniors at risk; no mental health support

**LILO Value:** Remote therapeutic support; crisis alerts to caregivers; continuous monitoring

### Medicare/Medicaid Vendors (RPM, CCM)

**Current Pain:** Need scalable mental health component for existing programs

**LILO Value:** RPM-qualified device; billable under CPT 99453-99458 (\$1,560/patient/year); CMS 2026 rule: 2 days/month (down from 16) = 75% easier

# Business Model, Competitive Edge & Investment Opportunity

## Multiple Revenue Streams Across the Ecosystem

**\$50-75**

### Platform Subscription

Per resident/month for facilities & home care.  
Scale potential: \$720M-\$2.2B ARR across US senior care market.

**\$1,560**

### Medicare RPM Billing

Per patient/year (CPT 99453-99458). \$1.56M revenue per 1,000 patients integrated.

**\$50K-150K**

### Customer ROI

Annual savings per 100 beds. Facilities save \$2-3 for every \$1 spent on LILO.

**Additional Revenue Streams:** Payer contracts (PMPM basis with MA Plans and Medicaid MCOs), white-label licensing for health systems (70/30 revenue share), and optional family portal premium (\$50-100/month per family).

## 18+ Months Head Start: No Direct Competitor

Capability	LILO Engine	Competitors
Crisis detection accuracy	<b>100% recall</b>	60-70% (miss 1 in 3)
Response time	<b>&lt;1 second</b>	15-30 minutes
Built for seniors	<b>✓ Yes</b>	✗ Generic/younger adults
HIPAA compliant	<b>✓ Day one</b>	✗ Often retrofitted
FDA pathway defined	<b>✓ Oct 2026</b>	✗ None or unclear
On-premise deployment	<b>✓ Yes</b>	✗ Cloud-only
Works in home care	<b>✓ Yes</b>	✗ Facility-only
RPM billing eligible	<b>✓ Yes</b>	✗ Not designed for it

**No direct competitor** offers elderly-specific therapeutic AI with 100% crisis detection, clinical integration, AND payer alignment. AI mental health is the fastest growing segment at 24% CAGR (\$1.45B today → \$11.84B by 2033).

## Milestones & Investment: \$1.1-1.5M to FDA Clearance + \$1M ARR

### ✓ COMPLETE: Platform Built

65K+ lines of code, HIPAA compliance (\$164.312), crisis detection validated, 9 additional modules complete. **\$0 external funding used.** Development value: \$875K-\$1.7M.

### Phase 1: Pilot Study (\$200-280K)

Clinical validation (n=20 participants), secure 3 facility contracts, outcomes data collection. **Target: July 2026.**

### Phase 3: FDA Clearance (\$500-700K)

FDA clearance achieved, scale to 30 facilities, reach \$1M ARR. **Target: December 2027.**

1

### NEXT: Module Integration (\$80-113K)

Frontend UI completion, module wiring, edge device demo. **Target: February 2026.**

2

### Phase 2: FDA Submission (\$300-400K)

FDA regulatory pathway submission, expand to 10 facilities, EHR integration. **Target: December 2026.**

3

4

5

## Use of Funds

- **Clinical validation studies:** 35%
- **Engineering (integration, EHR):** 25%
- **FDA regulatory pathway:** 20%
- **Sales & marketing:** 15%
- **Operations:** 5%

## Why Invest Now?

- **De-risked:** 85-90% built, technology proven
- **Capital efficient:** \$1.5M to FDA and \$1M ARR
- **Massive market:** \$3T+ TAM
- **Regulatory tailwind:** CMS expanding RPM
- **First mover:** No integrated competitor
- **Ecosystem fit:** Works across all care settings

## Founder: Aejaz Sheriff

Built the entire platform solo in 4 months (65,000+ lines of production code). 28 years enterprise architecture experience, including 12 years as Principal Architect at Blue Cross Blue Shield, where he architected systems serving 5+ million members. AWS Solutions Architect Professional and Machine Learning certified. Deep understanding of payer/provider ecosystem from BCBS tenure.

## The Ask

**Seeking pilot partners:** Facilities, home care agencies, PACE programs who want to evaluate a working platform (available NOW)

**Seeking strategic partners:** Medicare Advantage plans, Medicaid MCOs, health systems seeking mental health solutions

**Seeking investors:** Seed/Pre-A discussions (\$1.1-1.5M to FDA clearance)

**Seeking advisors:** Geriatric psychiatry, healthcare sales, FDA regulatory

"We're building the AI that ensures no senior suffers a mental health crisis alone—whether in a facility or at home."
